## **Release**

### **Office des Changes: a further step towards proximity to its users**

*The Office des Changes has just formalized the opening of a registry office in Casablanca.*

After launching its SMART online services platform in March 2020, the Office des Changes, resolutely committed to establishing its proximity to its users, is setting up a space dedicated to them within its premises in Casablanca.

Located in the heart of Casablanca, at Chatila street of Palmier district, this new structure will ensure reception, information as well as the reception of requests and correspondence from users, which will save time for citizens and economic operators living in the city of Casablanca and its regions.

This initiative aims to further strengthen the commitment of the Office des Changes in the implementation of its assistance policy with its users, especially during the current context of the general state of health emergency.
