Press release

A delegation from the Central Bank of Mauritania on a working visit to the Office des Changes

Continuing its dynamic of exchange and sharing of experiences internationally, the Office des Changes receives, from April 22 to 29, 2024, a delegation from the Central Bank of Mauritania on a working and study visit to Morocco to inquire about Moroccan experience in the supervision of foreign exchange operations.

This meeting, which will be punctuated by a fruitful and informative exchange between representatives of the two institutions, aims to support experts from the Central Bank of Mauritania in the process of establishing an effective system for monitoring foreign exchange operations.

The themes included in the program of this visit will relate in particular to the system governing foreign exchange operations (regulation and supervision), manual exchange operations (regulatory system and supervision tools), special regimes and the approach for the design and implementation in place of a collection of regulatory texts.

The choice of the Office des Changes to provide support and assistance to the Central Bank of Mauritania demonstrates the trust and credibility enjoyed by the Institution in the field of control of foreign exchange operations.

This visit also reflects the interest given by the Office des Changes to strengthening the solidarity partnership with Africa. To this end, it advocates solid cooperation, based on the exchange, sharing and transfer of good practices both in terms of controlling foreign exchange operations and in terms of establishing foreign trade statistics.
