Release

OC CONNECT mobile application integrates digital identification for an enhanced user experience

As part of the digitalization and modernization of its services, the Office des Changes has integrated its mobile application OC CONNECT with the national digital identification solution (E-ID), developed by the Direction Générale de la Sûreté Nationale (DGSN).

This innovative system aims to provide a secure and fully digital service, enabling users to register and access various services related to personal foreign exchange allocations safely and easily, using their national identity card.

The app is available for free on the Play Store (Android) and App Store (iOS), allowing users to securely access their personal foreign exchange allocations, use the Additional Allocation Service to calculate the supplement for personal travel and receive instant alerts for every foreign exchange operation.

The launch of the new version of the OC CONNECT mobile application is part of the digital dynamics of the Office des Changes, which mainly aims to facilitate citizens' access to its various services, to strengthen the proximity and efficiency of the Administration and to secure its relationship with users.

A presentation video and a user guide are available on the institutional website of the Office des Changes www.oc.gov.ma to assist users in using the new version of the application.
