Release

The Office des Changes Launches « SARF »

A Digital Platform for Foreign Currency Exchange Operations

The Office des Changes announces the deployment, as from 15 June 2026, of its "SARF" platform, dedicated to the digitalised, real-time and secure management of foreign currency exchange operations. This launch comes at the end of an extensive training programme rolled out across all regions of the Kingdom, for the benefit of currency exchange companies, in order to ensure optimal mastery of the new platform's functionalities.

The Office des Changes has also set up a unit to support operators during the launch phase, together with educational materials, in particular explanatory videos and guides detailing the procedures for accessing and using the new platform.

In functional terms, the "SARF" platform covers the entire range of activities of currency exchange operators, in particular the management of foreign currency purchase and sale operations with customers and the issuance of the related slips. The solution also provides operators with an assistance and support mechanism designed to strengthen vigilance and compliance with regard to Anti-Money Laundering and Combating the Financing of Terrorism (AML/CFT).

The deployment of this new solution forms part of the efforts undertaken by the Office des Changes to consolidate the compliance and traceability of foreign currency exchange operations, enhance the support provided to currency exchange operators, and strengthen the supervisory framework, in line with the orientations of the Institution's 2025-2029 strategy.
